EDUCATION

University of Texas at Austin

BS, Computer Science (Dean's List)

Austin, TX

Aug. 2022 – May 2026

EXPERIENCE

Search Infrastructure Intern

Austin, TX

Latticework Systems

May 2025 – Aug 2025

- Query latency in the ranking service was dominated by cold cache misses; adding a tiered LRU cache cut p99 latency from **480ms to 90ms**
- Built a **Go-based indexing pipeline** that reprocesses 40M documents nightly, replacing a **14-hour** full rebuild with a **2-hour** incremental one
- Wrote a relevance-scoring harness that A/B tests ranking changes against 25 query sets before rollout
- Traced a tokenizer bug that was silently dropping non-ASCII terms, recovering recall on roughly **6%** of queries
- Added query-shape validation to the ingestion API so malformed filters get rejected before hitting the index

Mobile App Lead

Austin, TX

Longhorn Founders Guild

Sep. 2024 – May 2025

- Rebuilt the club's iOS/Android app in **React Native**, cutting cold-start time from **4.2s to 1.1s**
- Added offline sync with conflict resolution, cutting failed submissions over flaky campus wifi by roughly **90%**
- Shipped push notifications for event reminders, lifting RSVP show-up rate from **61% to 84%**
- Led a team of **4** volunteer developers to ship a member directory used by **2,100+** students, now averaging **4.7 stars** across app stores

Security Contributor

Austin, TX

Longhorn Security Collective

May 2024 – Aug 2024

- Ran a dependency audit across the club's stack, finding and patching **9** vulnerable packages before a public writeup could flag them
- Added rate limiting and CSRF protection to the member portal, closing **2** exploitable auth-bypass paths
- Wrote a secrets-scanning pre-commit hook that's blocked **30+** accidental credential leaks since rollout

PROJECTS

Trail Route Planner - React, TypeScript, Node.js, PostgreSQL

Feb. 2026 – present

- Built a closure-aware routing engine on top of OpenStreetMap data for **500+** hikers
- A* search with a custom elevation-gain heuristic replaced brute-force pathfinding, cutting route computation from **12s to under 1s**
- Users can report closures live; affected edges re-weight instantly instead of triggering a full graph rebuild

Campus Event Finder - React, TypeScript, Tailwind CSS, Firebase

Sep. 2024 – Dec. 2024

- Consolidated **9** separate club calendars into one searchable feed used by **1,100+** students
- Added tag-based filtering backed by a denormalized Firestore index for instant search
- Push notifications for saved searches lifted week-over-week return visits roughly **3x**

Chess Endgame Solver - C++

Jan. 2023 – Feb. 2023

- Bitboard-based minimax with alpha-beta pruning and a transposition table solves 5-piece endgames in under **2 seconds**
- Took **1st of 60** submissions in a department programming contest judged on correctness and speed

SKILLS

Languages : JavaScript, TypeScript, Python, Java, C/C++, SQL

Frameworks & Tools : React, Node.js, Django, Docker, Git, Linux, AWS, CI/CD
